

# Earscopes

Data Sheet

## Earscopes II

**Earscopes II** were designed as the most affordable and technologically advanced Electronic Hearing Protectors available!. These semi-custom Earscopes fit over 90% of our customers, and with a few modifications we can handle the other 10%. We recommend them primarily for hunting. The Earscopes II have a NRR of 23, so we do not suggest competitive shooting users to wear them. They are programmable to correct your hearing, They shut down during gunfire and allow you to hear as clear as you ever have! Earscopes II are highly recommended for Bow Hunters!
